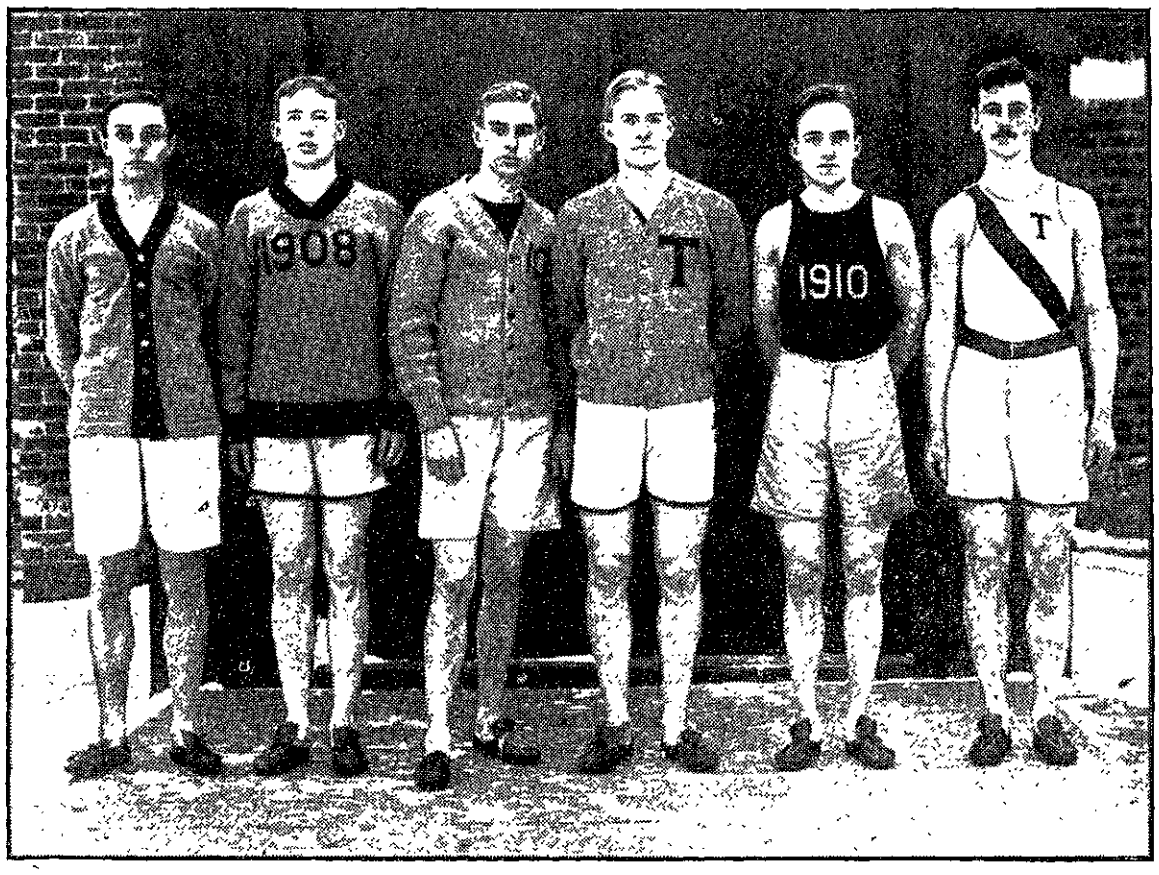
THE TECH

VOL. XXVII. No. 45 BOSTON, MASS., FRIDAY, FEBRUARY 14, 1908 PRICE THREE CENTS



RECORD-HOLDING INDOOR RELAY TEAM.
Left to Right — W. C. Salisbury 1911, H. W. Blackburn 1908, H. Lockett 1910, C. W. Gram 1909, K. D. Fernstrom 1910, B. L. Gimson 1908.

TUFTS WINS TWICE FROM TECHNOLOGY.

TECH SHOWS UP POORLY.

First and Second Teams Meet With Defeat in Ragged Games.

Tufts proved Wednesday night to be superior to Tech in basket ball at every point when her first and second teams won in games with the corresponding teams of her rival.

The 'varsity game went to the Medford institution, 16 to 13. The play was very ragged. Tech led at the end of the first half, 8-6, but Tuft's soon took the lead in the second half and held it to the end. Both games were very poor and were a wretched exhibition for Technology. The score:

TUFTS.		TECH.
Kimball	rf	lb. Nichols
Dickinson,	lf	rb. Parker
Getchell	c	c. Wentworth
Wallace	rb	lf. Cahill
Hatch	rb	rf. Hargraves

Score, Tufts 16, Technology 13. Goals from floor, Hargraves, Parker 2, Getchell 2, Cahill 2, Wallace 2, Kimball. Goals from fouls, Dickinson 6, Cahill 3. Referee, Velte. Timer, Shaw. Time, 30m. halves.

EMERSON 1908 WINS SHOW PRIZE.

Has Best Design for Poster.

Alexander M. Emerson has been awarded the prize for the poster of "Over the Garden Wall." Of the dozen or so drawings entered in the competition, his was finally judged the best.

A large number of particularly pleasing drawings were sent in this year, Freshman work, as last year, attracting considerable attention.

Emerson entered the Institute only last fall, after working for many of the best firms in Boston, and spending a year abroad. His design is said to be one of the best the Show has ever had, and only that of the "Chemical Maid" compares with it in attractiveness.

SHOW REHEARSALS BEGIN TOMORROW.

CANDIDATES CALLED TOGETHER AT THE UNION.

Complete Trial Selections of Cost to Be Made By Coach Francis.

Rehearsals for "Over the Garden Wall" are to commence Saturday afternoon. The call has been sent out for candidates for principal and chorus to meet at the Union at two. James Francis will be there and complete trial selections will be made.

It is necessary to rush the work as much as possible this year, as the rehearsals commence on the same day as last year, while the performances come a week earlier. Hence everyone who is coming out for the Show should be on hand Saturday afternoon, ready to do his best.

Only great cooperation on the part of all will enable as finished a product as last year. Inasmuch as the book, according to Mr. Francis, is the best the Show has ever had, it would be a calamity not to have the rest of the work equally surpass former years.

Some of the best men from "William, Willie and Bill," as Kibbey, Hield and Jenkins, are to be back, but many other good ones will not be with the Show again. The Freshman Class has the opportunity to turn out many stars, if it will enter into the work with true Tech spirit.

This year the Show is to go to Northampton in its own Pullman train, and the fellows will be given a good time. A special caterer will accompany the train to supply the inner man. At least two dinners will be given the cast, instead of one, if the usual number of performances take place. The Show management says, "No Tech man will ever regret the moments spent in lending prestige to the Institute and obtaining money for whatever good purpose it may be put to."

TECH WILL NOT MEET B. A. A. TOMORROW EVE.

MARRIAGE AND BAD ANKLE CAUSE B. A. A. TEAM TO DISBAND.

Special Team is Being Made Up.

"It can't be helped. One member is to be married, another has turned his ankle, and the other two can not run under the club's insignia." This is the reason why the crack Technology Relay Team will not be met by the B. A. A. team in the short distance tomorrow night at the Lawrence Light Guard meet.

The management is trying to find four men to make up a fast enough team to give Tech a race. This team will probably be made up of one man each from the B. A. A., Batttery A, the First Corps of Cadets, and Harvard. The distance is 352 yards for each man.

Technology will be represented against Tufts in a 2-mile relay race by a fast team, composed entirely of Freshman.

The members are W. C. Salisbury, who took third in the 1,000 yds. in the B. A. A. meet; C. P. Eldred, who took second in the mile in the same meet; P. D. White, who won the half-mile in the fall meet; and W. T. MacCreadie of the Cross Country Team.

Both teams are in good shape. Great disappointment is felt on account of the disbanding of the B. A. A. team, as it was hoped that this team might be able to push the Tech quartet to the limit. There will, however, be a good race with a team of selected runners, and no doubt a new record will be set for the distance.

Besides the two team races, Technology will be represented in the 40-yard dash, the 440-yard dash, the half-mile and the mile runs.

PROF. JAGGAR GIVES MOST INTERESTING LECTURE.

Prof. Jaggar last evening gave an interesting and instructing lecture on "The Evolution of Bogoslof" to a large audience at the Society of Arts meeting in 22 Walker. His address, which was fully illustrated by lantern slides, was the same as outlined in the last issue of The Tech.

DETAIL STATEMENT OF SHOW FINANCE.

ELEVEN HUNDRED DOLLARS TURNED OVER TO ATHLETES.

Receipts from Boston Ticket Sale was $3,500.

The following is the detailed statement of last year's Show to date in accordance with the special article on the finances in a recent issue of The Tech:

RECEIPTS.	
Boston ticket sale	$3,537.50
Malden ticket sale	693.75
Providence ticket sale	641.50
Advertisements in programs	636.12
State St. Trust Co. (loan)	500.00
Sale of Scores and Posters	425.40
Check paid to C. C. Webb (deposited)	150.00
Check paid to H. McCready (deposited)	100.00
Rebate from Colonial Theatre (orchestra)	70.00
Total	$6,754.27

EXPENDITURES.	
Advisory Council (athletic assoc.)	$1,100.00
Printing and engraving	988.15
James Francis (coach)	669.25
State St. Trust Co. (p'y of loan and int.)	519.17
Rent of Colonial Theatre	473.42
Costuming	419.50
J. M. Flocton (conducting orchestra)	369.90
Show dinners	241.38
Wigs	200.00
Management expenses	162.78
Stationery	146.05
Stenographer	132.00
Providence expenses	262.08
Check to C. C. Webb (to cover bills)	150.00
Check to H. McCready (to cover check on McCready made to Tech Show, 1907)	100.00
B. B. Gillette (arr. of music)	96.57
Advertising	71.32
Transportation	75.00
Library Bureau Co.	55.45
Thorde (pianist)	35.00
N. G. Wood	38.93
Camera (present to Francis)	25.70
Rebated on tickets	25.00
Loan to 1910 athletics	29.00
Officer drawer for change	20.00
Paid out on account of 1906 Show	15.88
S. R. T. Very (poster prize)	10.00
Photographs	5.25
M. I. T. Telephone	1.15
Debit to Cash Acct. "Tech Show 1908"	316.54
Total,	$6,754.27

ENERGY OF ESCAPING STEAM.

Original Investigation to be Undertaken at the Institute.

Professor Edwin F. Church Jr. 1901 will this term prepare a thesis for the degree of master of science in the mechanical engineering laboratories of the Institute. He will determine the energy of steam escaping against varying back pressure. Work of like character has been done in Germany but has never been attempted before at Technology.

Prof. Church was in the class of 1901 in naval architecture and is now associate professor of mechanical engineering at West Virginia University. He spent last summer here preparing and perfecting the necessary apparatus and will begin work February first.

In outline his method of procedure will be this: a nozzle increasing in diameter from 7-8 in. to 2.57 in. is suspended within a large iron cylinder by a flexible tube. Steam will be admitted by this tube and will escape through the nozzle at a velocity of 4000 ft. per second in a direction normal to the tube. The varying pressure in different parts of the cylinder will be measured by a tube 2mm. in diameter inserted through the head of the cylinder. The energy of the escaping steam will be determined by a direct measurement of the backward thrust of the nozzle. Waste steam will be conducted from the cylinder to a condenser and there measured.

THE TECH

Published every Monday, Wednesday, and Friday during the college year by students of the Massachusetts Institute of Technology.

Entered as second-class matter October 6, 1904, at the post office at Boston, Mass., under the Act. of Congress of March 3. 1879.

SHOW MANAGEMENT.

In another column of this issue there appears an appeal from the management for men to make up its numbers. It hardly seems appropriate that this should be necessary when the Show's part in Institute life is so evident. It might be well to take up at least two of the reasons why the management finds it necessary to make this appeal.

The management has in the past assumed a conservative and independent policy regarding its affairs which has been incompatible with its general position in Institute life. In the second place the amount of work that must be done has interfered with studies, and several men have lost their degrees on this account. The first policy has been materially changed this year and everything possible has been done to make public the conduct of the Show affairs, particularly in connection with competitions. As the labor connected with detailing all to everyone is too great, a representative committtee has been appointed and kept well informed.

The second difficulty has been attacked by eliminating from competition all people who are weak in their school work.

There should be a sufficient number of really intelligent men in an institution of Tech's standing, however, who can do the Show work and their school work at the same time. These men should step forth and go out for the management. Although the work makes greater demands upon one's time and its associations are not so general as in the east, the experience is very valuable. Anyone who is in good standing in his studies may be certain of a fair trial in the competition. The strain upon the studies will not be so great this year as usual as a large amount of preliminary work has been completed.

COMMUNICATION.

To the Editor of The Tech:—

The competition for the Tech Show management, up to the present, has failed to produce enough men of desirable calibre. Therefore it is necessary to appeal to the student body of the Institute to send out men who will and can do the necessary work. There are six positions open:—Advertising managership, two assistant business, one assistant stage, and two assistant advertising managerships.

Men will obtain these positions only through the regular competition. They will be judged upon 1. Initiative. 2. General and executive ability. 3. Intelligence. School work is taken into consideration and those who have difficulties with their studies are not urged to attempt the work.

All candidates, old and new, will be judged as their work merits it, and the best man gets the best place. Doubting Thomas may be assured by the Show Advisory Committee.

FREDERIC A. DEWEY.

MORE ECHOES.

Heeler's Issue Again Critized. Temporary Editor-in-Chief Asked to Correct.

Mr. W. D. Green, Editor in Chief,
The Tech, Mass. Inst. Technology,
Boylston Street, Boston, Mass.

Dear Sir:—

In the report of the meeting January 9th, of the Electrical Engineering Society, M. I. T., given in The Tech Friday, Jan. 10th, I find a statement which strikes me as being just enough inexact to be misleading, as well as doing an injustice to a fellow engineer. I would therefore ask the privilege of a word of explanation to your readers in this connection in order to set the matter right.

Your report says:—"At this stage of the game Mr. Neall was greatly assisted by an architect whose constant experience in arranging showed to very good advantage, despite the fact that he did not know what he was doing."

Since I spoke extemporaneously I cannot recall my exact words, nor have I any other measure of the impression my expressions might have created but what I really wished to bring out is this:—

The engineer whom I was assisting is not an electrical engineer, but he has had large experience with distinguished results in industrial design, covering chiefly civil, architectural and mechanical engineering, with a certain amount of consideration given of course to such problems in electrical engineering as motor installations and small generating stations, as now naturally link themselves with such work.

When it came to arranging the apparatus and wiring in the power house, I found he could invent arrangements which were both novel and practical, and, moreover, could secure results which would be as satisfactory architecturally as they were necessary electrically.

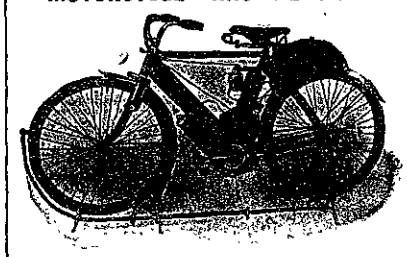
When one considers that these results were accomplished without his being an expert in the technique of electrical engineering, the purely electrical engineer has another instance of the value of his work given by association with men of experience in allied lines.

It should be clear from this that the statement "he did not know what he was doing" is unfortunately chosen.

Yours very truly,

N. J. NEALL.

ALL WELL INFORMED MOTORCYCLISTS KNOW THAT THE INDIAN MOTORCYCLE HAS ALWAYS BEEN THE LEADER AND IS NOW!



The factory is turning them out at the rate of thirty-five (35) a day and they are being sold ahead at list price. No rebate checks used! Their list price is their value.

We are booking orders fast and will deliver at time agreed.

IMPORTANT THESIS IN COURSE IV.

A. H. Tashjian Doing Graduate Work on Concrete.

In the Laboratory of Heat Measurements A. H. Tashjian is carrying on a thesis in connection with his graduate work in architecture in which he is making a study of the physical properties of concrete. The determination of the change in strength, in rate of expansion and in specific heat or portions of structures composed of concrete and steel has become the subject of great interest within the last few years and Mr. Tashjian is beginning a systematic study of these properties over wide ranges of temperature.

CALENDAR.

Friday, February 14, 1908.

1.00 P.M. Board of Editors of The Tech meets in 30 Rogers.

Saturday, February 15, 1908.

1.00 P. M. Musical Clubs' Picture Taken at Purdy's.

2.00 P. M. Show Candidates Meet at Union.

2.00 P. M. Chess Club Meets at Union.

8.00 P. M. Lawrence Light Guards' Meet at Medford.

Monday, February 17, 1907.

6.00 P. M. Exeter Men Meet on Rogers Steps.

Sunday, February 16, 1908.

9.00 A. M. Regular Meeting of Tech Brotherhood of St. Andrew at Trinity Church.

NOTICES.

CHESS CLUB.—Important meeting at 2 P. M. tomorrow at the Union.

EXETER MEN.—All who are going to the dinner will meet at 6 P. M. Monday on Rogers' steps.

MANDOLIN CLUB.—All men who played in the Winter Concert are expected to be in the Club Picture Sat. 15, at Purdy's.

THE TECH.—There will be an important meeting of the Board of Editors of The Tech, today at 1.00 P. M.

MUSICAL CLUBS.—The Musical Clubs will have their pictures taken at Purdy's, 146 Boylston Street, at 1 P. M. Saturday, instead of at Notman's.

1909.—Collectors please leave names of all members of 1909, who have paid their class-dues in full, at the Cage on or before Feb. 21, for J. I. Finnie Treas.

EPISCOPALIANS. — The regular monthly meeting and corporate communion of the Tech Brotherhood of St. Andrew will be held Sunday at 9 A. M. at Trinity Church. Important business will be brought up.

BIOLOGICAL SOCIETY.—Dinner at the Union Wednesday, Feb. 19, at 6.30 P. M. Prof. Sedgwick will speak on "The Outlook for Biology and Sanitary Engineering in the Twentieth Century." On account of the opportunity to hear Prof. Sedgwick, all interested are invited to attend. Tickets (fifty cents), from Miss Estabrook (Sec. in the Biol. Dept.), Harrub XI, Hoyt VII, or McNutt VII, until Tuesday, Feb. 18.

ELEC. ENG.—A meeting of the Boston section of the American Institute of Electrical Engineers will be held Wednesday, Feb. 19, at 8 P. M., in the auditorium of the Edison Electric Illumination Company, of Boston, 39 Boylston Street. Mr. D. DuBois, of the General Electric Company, Schnectady, N. Y., will deliver an address, illustrated by lantern slides, on "The Latest Developments of Lightning Protection."

CLASSIFIED ADS.

Advertisements of this kind under different classifications are inserted at the rate of five cents a line, averaging six words to a line, payable in advance.

COMFORTABLE ROOMS. — Good board. Freedom of house. Two in a room, $11.50. Singly, $7.50. Twenty-five minutes to Tech. 67 Fuller Street, Brookline. Telephone, Brookline, 2325-2.

SECOND HAND TEXT BOOKS.—A few second hand books needed in the second term can be had by applying at Box 52 Cage, Book Exchange.

WE WILL PAY TO TECH STUDENTS, FOR FOUR OF THE BEST WRITTEN ADS OF THE M. M. MOTOR-CYCLE, THE FOLLOWING AMOUNTS:

For the Best ad. $100

For the Second best $75

For the Third best $50

and for the Fourth best $25

These amounts are to apply on the purchase price of an M.M. Motorcycle. The Copy must be at least 75 words and not more than 150 words. All copies must be handed in at our store by the writer personally, on or before March First, 1908.

We shall be pleased to give any student all the information possible about the M.M. at our store, and advise that you study the construction of our machine, also our catalogue and other printed matter, so that you may get sufficiently familiar with the M.M. and its construction to write an advertisement that carries weight. The ads will be passed upon by our advertising Department.

We reserve the right to use any part of any ad submitted. We shall print the best ad in full in one of the Sunday papers, and also run a Picture of the writer, mounted on the M.M. Special. Every Student should avail himself of this opportunity. It costs nothing to try.
